

REINSURANCE HOT NEWS

October 3, 2006

Notification sent to all CEO's 09/26/2006

We currently have a system issue with the acute reinsurance processing, primarily related to the TWG and PPC cases. If you or your reinsurance analysts are getting into the system to review anything for projected payments, the numbers are going to look high. We are working on getting it corrected and will keep you posted. Please don't base anything on these numbers yet.

The issue will be corrected prior to the next RI payment cycle which is early October.

Thanks for your patience.
